Note: This is what was ordered inventories may change based on actual availability at shipping time.

Item	Description	Chill Hrs	Loc.
<b>2021 Fruit Tree List</b>			
<b>ALMONDS</b>			
All In One	The #1 almond for home & orchard, this tree produces heavy crops. Its large crops tend to stunt the tree, making it a semi-dwarf. Medium to large soft shelled fruit, sweet kernels. Ripens Sept. to Oct. <b>Self fruitful.</b>	<400 hrs	P
<b>APPLES</b>			
	<i>Though some apples indicate high chill requirements, most will set fruit in low-chill and coastal environments. Color, however, may not be optimal.</i>		
Anna	Remarkable apple for mild winter areas. Great in So. California. It bears large crops of sweet, crisp fruit. Green fruit with red stripes. Good fresh or cooked. Ripens in June. <b>Self-fruitful.</b>	200 hrs.	P S
Beverly Hills	Medium size fruit with yellow skin and red blush or stripes. Crisp and juicy bears well in mild climate areas. Ripens late June <b>Self-fruitful.</b>	200 hrs.	S P
Braeburn	Newer variety from New Zealand. Superb late season fruit, very crisp & tangy, more flavorful than Granny Smith. Excellent keeping apple. Green fruit with dark red blush. Ripens Oct. to Nov. Self-fruitful.	250 hrs	S
Dolgo Crabapple	Self fruitful. Makes tasty, bright red jelly. Grows 30' x 25'.	500 hrs	P
Dorset Golden	Outstanding sweet apple for warm winter areas. Firm, very flavorful, sweet like Golden Delicious. Yellow skin with an orange blush. Very low chill requirements. Ripens in June. Self-fruitful	100 hrs.	P S
Ein Shemer	Fast-growing, self-pollinating variety that produces crisp yellow fruit. It requires fewer cold days than many other apple trees. Sweet flavor.	100 hrs.	S
Empire	Sweet & juicy. Cross between McIntosh and Red Delicious. Good pollinizer for Mutsu, Gravenstein, Winesap, Jonagold. Self fruitful.	800 hrs	P
Fuji	Sweet, very crisp and flavorful, excellent keeper. Excellent pollinizer for other apples.	300 hrs	P S
Gala	Crisp, good blend of sweetness and tartness. Early harvest.	<500	P
Ghost	Very white skin and flesh, sweet, sub-acid flavor. Pollenized by any mid-season blooming apple.	300-400 hrs.	P S
Gordon	Popular low chill variety for So. Cal. Green skin overlaid with red. Good for both fresh eating and cooking. Ripens Aug to Oct. <b>Self-fruitful.</b>	400 hrs.	S

Chill hours listed are approximate, many trees will perform well with less than stated chill hours.

# 2021 Fruit Tree List

Note: This is what was ordered inventories may change based on actual availability at shipping time.

Granny Smith	Large, late, green, all-purpose apple good for eating, cooking & sauce. Crisp, tart, excellent keeper. Prefers long summers, thrives in hot climates. The tree has prolonged blooms and is a good pollinizer of other apples. Ripens in Aug. & Sept. Self-fruitful.	400 hrs	P
Gravenstein	Crisp, juicy & tart. Good for eating, sauce and baking. Pollenize with Empire, Fuji, Gala, Red Delicious.	700 hrs	P
King David	Firm & crunchy with balance of sweet and tart flavor. Juicy and aromatic with hints of spice and wine. Pollinate with Fuji, Granny Smith, Lady Williams or Pink Lady. Originated in 1893!	Low	P
Lady Williams	Firm white flesh is crisp and juicy. Flavor is sweet and balanced and improves the longer the fruit is on the tree. Pollinate with Fuji, Granny Smith, King David, Pink Lady or Sundowner. Good fresh, for sauces, baking and cider.	200-300	P
Liberty	Disease resistant. Crisp, rich sprightly flavor. Good fresh or cooked. Interfruitful with Red Delicious, Empire, McIntosh.	800 hrs.	P
Pettingill	Chance seedling discovered near Long Beach, CA., introduced in 1949. Large fruit with red over green skin, ripening late September to mid-October in coastal Southern CA. climates. Crisp and juicy, with a balance of sugar and acid.	300 hrs	S
Pink Lady (Crisps Pink)	Newer hot climate apple from Australia. Very crisp, sweet-tart distinct flavor. Good keeping apple. Skin is reddish-brown over green, with white stripe. White flesh resists browning. Ripens in Sept. Self-fruitful.	<400 hrs	P S
Rome Beauty	Late blooming, used primarily for cooking. Self fruitful.	1000 hrs	P
Sundowner	Sister to the Pink Lady apple. Sweet, crispy white, excellent flavor. Late ripening, October on. <b>Self-fruitful</b>	200-300 hrs.	P S
Winter Banana	Large, round, especially beautiful apple: pale yellow waxy skin blushed with rosy pink. Crisp, tangy, juicy flesh is highly aromatic with a mild, banana-like flavor. Long time favorite dessert apple in CA's mild winter coastal climates. Good cider apple.	400 hrs	S
<b>APPLES Multi Grafts &amp; Espalliers</b>			
4-on-1 Low Chill Combo	Probably Anna-Fuji-Dorset Golden-Gala		P S
4-on-1 Mild Climate Combo	Probably Fuji-Gala-Mutsu-Jonagold		P
3-on-1 Low Chill, espalliered	Probably Anna-Dorset Golden-Fuji		P S
Dorsett Golden 3 Tier			P
Espallier Fuji			P S
Espalliered 6 in 1			P S
<b>APRICOT</b>			

Chill hours listed are approximate, many trees will perform well with less than stated chill hours.

# 2021 Fruit Tree List

Note: This is what was ordered inventories may change based on actual availability at shipping time.

4-in-1/Fruit Salad	Offers four of the following five moderate-chill varieties into one outstanding tree. Elberta Peach, Fantasia Nectarine, Santa Rosa Plum, Blenheim Apricot and Babcock Peach are combined into a single tree and the smallest of the five limbs is removed at harvest to give you the strongest 4-in-1 tree possible.	300-500 hrs	P S
Autumn Glo	A newer late season apricot with a sweet, slightly acid flavor. The fruit is good both fresh and dried. It is juicy and very aromatic. It will please the most critical of apricot lovers. Harvest is later, August. Self-fruitful.	300-400 hrs.	S
Blenheim	All purpose freestone, sweet, aromatic and very flavorful. Long time #1 apricot in Calif. It blooms early, good for canning and drying. Ripens in June & July. <b>Self-fruitful.</b>	400 hrs or less	S P
Gold Kist	Excellent back yard apricot for warm winter climates. Freestone and very good quality. Heavy bearing tree. Ripens in June. Self-fruitful.	300 hrs	P S
Harglow	Late blooming. Orange freestone flesh is firm, sweet & flavorful. Self fruitful.	800 hrs.	P
Royal Rosa	Extremely vigorous, more disease resistant than other apricots. Bearing young & heavy especially nice fruit. Sweet, low acid and fine flavor. Very early harvest. Ripens in May & June. Self-fruitful.	500 hrs	S P
Tropic Gold	NEWER INTRODUCTION of a great new Apricot. This one does well in the warmer Southern California areas. The tree produces heavy crops which make the tree almost weeping. Ripens June to July. Bears young. <b>Self-Fruitful</b>	350 hrs. or less	P S
<b>Aprium</b>			
Cot-N-Candy Aprium	Wonderful new fruit from Zaiger Hybrids, early season harvest. White flesh is extra sweet and juicy with a plummy aftertaste. The fruit is about 2" to 2 1/2" in diameter on average. The tree is self-fruitful, no pollinizer needed.	<400 hrs	P S
Flavor Delight Aprium	Plum cross, resembles an apricot but has a distinctive flavor and texture all its own. High rating in taste test scores. One of the most flavorful early season fruits. Larger corps are born if pollinated by an apricot. Ripens in June. Self-fertile.	<300 hrs	S P
Summer Delight Aprium	Late producer, reliable producer, juicy, sweet apricot flavor.	500 hrs	P S
<b>CHERRIES</b>			
English Morello	Late season tart cherry for baking, sometimes eaten fresh when fully ripe. Dark red to nearly black. Rounded head tree with drooping branches. <b>Self-Fruitful</b>	<500 hrs	P
Lapins	Newer variety from Canada. Dark red, sweet cherry is large & firm. <b>Self-fruitful.</b>	400 hrs	P S

Chill hours listed are approximate, many trees will perform well with less than stated chill hours.

# 2021 Fruit Tree List

Note: This is what was ordered inventories may change based on actual availability at shipping time.

Minnie Royal	Medium-size red cherry, firm with good flavor. A very productive variety with low chill requirements. <b>Pollinize with Royal Lee or Royal Crimson</b>	300 hrs	P S
Royal Crimson	Self fruitful, low chill. Excellent pollinator for Minnie Royal and Royal Lee.	200-300	P S
Royal Lee	Large yellow cherry with more red blush than Rainier. Excellent flavor. <b>Pollinizer required, grower suggests Minnie Royal or Royal Crimson as possible pollinizers.</b> Low chill hours.	300 hrs	P S
Royal Rainier	Large yellow fruit with a red blush. Excellent flavor, ranks high in taste tests. Mid season harvest. <b>Pollinizer required, Lapins or English Morello are suggested.</b>	500 hrs	P
<b>FIG</b>	<i>Some figs may be potted. Some sources say there are more than 1,000 varieties of figs!</i>		
Black Jack	Large purplish black fruit with sweet juicy strawberry-red flesh. Fruit ripens in Aug. & Oct. Self-fruitful. Naturally semi dwarf tree.	100 hrs.	P
Black Mission	This is the favorite fig tree in the area. Medium to large fruit, has a purplish black skin with strawberry colored flesh. The flavor is very good. Fruit is good fresh, dried or canned. Large tree, good along the coast, does very well inland. Self-fruitful	100 hrs.	P S
Brown Turkey	Large bell shaped fruit has a brownish skin with pink flesh. Sweet, rich flavor best used fresh. Does well along the coast or inland. The tree is medium sized to large but can be pruned to just about any shape. Self-fruitful.	100 hrs.	P S
Celestial (Celeste)	Small to medium fruit. Violet to purplish-brown colored skin. Flesh is white, fading to rose at the center. Firm & juicy, sweetest of all. Excellent quality. Best to avoid extremes of heat & cold, likes moderate coastal climates. Two crops a year. Self-fruitful.	100 hrs.	S P
Excel	Yellow-green skin, amber flesh. Mild sweet, rich flavor. Produces two crops a year. Good fresh or in jams. Self-fruitful.	100 hrs.	S p
Flanders	Skin is brownish-yellow with violet stripes, amber flesh. Strong fine flavor. Excellent all purpose fruit. Good spring crop. Good in southern California, coastal or inland. Self-fruitful.	100 hrs.	S P
Janice - Seedless Kadota	Newer white fig, large, sweet & delicious. Light greenish-yellow fruit with practically no seeds. Prolonged harvest Aug.-Nov. Well suited to coastal & inland climates. Can be pruned to almost any shape. Self-fruitful.	100 hrs.	P S
Panache 'Tiger Fig'	Especially fine flavor. Small to medium sized fruit with green color skin and yellow 'Tiger' stripes. Strawberry pulp is blood-red in color. <b>Self-fruitful.</b>	100 hrs.	S P

Chill hours listed are approximate, many trees will perform well with less than stated chill hours.

## 2021 Fruit Tree List

Note: This is what was ordered inventories may change based on actual availability at shipping time.

Peters Honey	Beautiful, shiny, greenish yellow fruit when ripe. Very sweet dark, amber flesh. High quality. Superb for fresh eating. Originated in Sicily <b>Self-fruitful</b>	100 hrs.	P
Violette de Bordeaux	Smaller fruit is purple-black in color. It has a "strawberry" pulp that has a distinctive sweet rich flavor. Excellent fresh or dried. Smaller tree can be container grown. <b>Self-fruitful</b>	100 hrs.	P S
White Genoa	Large fruit has a yellowish-green skin with yellow to light strawberry flesh. This fig has unusually few seeds. Use it fresh or for drying. Good coastal or inland. <b>Self-fruitful</b>	100 hrs.	S
<b>JUJUBE</b>			
GA866	Fairly new variety of outstanding quality. The jujube fruit is large, elongated, and very high in sugar content. GA 866 Jujube's sweet apple flavor is great when eaten fresh from the tree. The GA 866 Jujube's fruit is also great when candied or dried. Partially self fruitful.	150 hrs	P
Sugar Cane	Extremely sweet fruit, like candy! Sometimes called "Chinese Date". Best grown inland where it is warmer. Partially self fruitful.	150 hrs	P
<b>Kiwi</b>			
Issai Self Fruitful	Fuzzless, small, fruit can be eaten like a grape without peeling. Very high in Vitamin C. New growth tender to frost, but recovers quickly. Self-fruitful.	300 hrs	P
Tomuri Male	Pollenizer for Vincent female. Does not bear fruit.	100 hrs	P
Vincent-Female	Vigorous vine that produces delicious, egg-sized fruit. Female fuzzy kiwi needs a male (Tomuri) kiwi for pollination.	100 hrs	P
<b>MULBERRY</b>			
Black - Dwarf	Fruit is large, resembling a blackberry, sweet and luscious. When not devoured fresh it is ideal to use in jams, wines and mulberry pies	200 hrs.	P S
Pakistan Cookes Select	Sweet, flavorful, raspberry-tasting berries. King of the Mulberries	100 hrs	P
Persian	Large, black tasty fruit similar to blackberries.	<200	P
Persian White	Medium-sized, sweet, white fruit shaped like blackberries. Grows at a moderate rate to 20-60 ft. depending on soil quality and depth. Drought tolerant once established. Grows larger and more rapidly with irrigation.	200 hrs	P
Tea's Weeping	Fruiting, weeping tree, fast growing to about 20 feet and as wide. Fruit is "blackberry-like".	200 hrs	P S

Chill hours listed are approximate, many trees will perform well with less than stated chill hours.

Note: This is what was ordered inventories may change based on actual availability at shipping time.

NECTARINE			
Arctic Babe Mini	Genetic dwarf white nectarine. Reliable, self fruitful.	700 hrs.	S P
Arctic Sprite Mini	White-fleshed freestone fruit with delightfully tangy-sweet flavor, ripening in late midseason. Spectacular spring bloom. Self-fruitful.	450 hrs	S
Arctic Star White Subacid	Newer variety of low acid, super sweet white flesh. Rave reviews in trial taste tests. Beautiful dark red skin, snow-white semi-freestone flesh. Low winter chill. <b>Self-fruitful.</b>	300 hrs	S P
Desert Dawn	Proven heavy producer of delicious nectarines for warm winter western climates. Solid red skin, juicy yellow semi-freestone, rich flavor. Mid to late May. Self-fruitful.	250 hrs	S
Desert Delight Semi-Dwarf	Superior low chill early season nectarine. Large bright red skin with yellow flesh. Rich, tangy flavor, well adapted to mild winter areas. Good along the coast & inland. This tree can be heavily pruned if you want to keep it under 10' tall. Ripens in June. <b>Self-fruitful.</b>	200 hrs.	P
Double Delight	Sensational fruit, consistently the best flavored yellow nectarine. Magnificent double pink blooms. Dark red skin, freestone fruit is sweet with unusually rich flavor. Always scores high in taste tests. The tree is heavy bearing. Ripens in July. <b>Self-fruitful.</b>	200 hrs.	P S
Necta Zee Dwf	Sweet, very flavorful yellow freestone. Self fruitful.	400 hrs.	P
Necta Zee Miniature High Head	Sweet, firm, flavorful, yellow freestone nectarine with beautiful red skin. Best self-fruitful miniature nectarine. Ripens mid June to early July. Strong, vigorous tree to 6 ft. <b>Self-fruitful.</b>	400 hrs.	S P
Panamint	Attractive fruit has red skin with yellow freestone flesh. Heavy producing variety in mild winter areas. Intensely flavored, nice acid-sugar balance. Dependable longtime favorite. Ripens in July. Self fruitful.	250 hrs	S
Snow Queen	This nectarine has wonderful flavor and rates high in taste tests. Sweet & juicy, early season & freestone. A favorite in S. Calif. Because of the low chilling requirements. Ripens in June & July. <b>Self-fruitful.</b>	250-300 hrs	S P
Sol Dorado Mini	Early mid-season yellow-fleshed freestone fruit with especially nice acid-sugar balance and wonderful, rich nectarine flavor. Spectacular spring bloom. Tree is very easy to thin and harvest, easy to cover to protect from spring frost. New selection for the 2020-21 season.	450 hrs	S
Necta Plum Spice Zee	White-fleshed, nectarine-peach-plum hybrid. Skin is dark maroon at fruit set, and turns pale pink when ripe. Fully ripe fruit is unparalleled in flavor, and both nectarine and plum traits are easily detectable.	200-300 hrs.	PS

Chill hours listed are approximate, many trees will perform well with less than stated chill hours.

Note: This is what was ordered inventories may change based on actual availability at shipping time.

<b>PEACH</b>			
August Pride	Large all-purpose yellow freestone for mild winter climates. Sweet aromatic, rich flavor, one of the very best. Ripens in late July to Aug. Self-fruitful.	300 hrs	S P
Babcock	Longtime favorite white-fleshed freestone peach. The skin has a red cheek. The fruit is medium size, on a heavily producing tree. Ripens in July. Self-fruitful	250-300 hrs	S
Bonanza Miniature	This is a true dwarf peach tree that will get to about 4-5' tall. Small & compact growing, shrub-like. Lots of leaves drooping from the short, stubby stems. Light pink blooms followed by medium sized fruit. Yellow skin with a red blush. Yellow freestone flesh with good flavor. Ripens in June. Self-fruitful	300 hrs	S
Bonita	Medium to large fruit has red blushed skin. Yellow flesh is a freestone peach. Fine flavor. Bears well in mild climate areas & coastal climates. Ripens in late July. Self-fruitful	300 hrs	S
Desert Gold	Ripens early. Good flavor and sweetness for such an early variety. Yellow clingstone. Self fruitful.	200 hrs.	P
Donut (Stark Saturn) (Saucer Peach)	Sometimes called "Peento Peach', unique white fleshed fruit with a shrunken center, somewhat shaped like a doughnut. Sweet, mild flavor described as some as almost almond-like. Ripens in July. Self-fruitful	200-300 hrs.	P S
Eva's Pride	Delicious fine flavored peach with a very low chilling requirement. Medium to large size yellow freestone, recommended as an early season peach for moderate climates. Ripens June & July. Self-fruitful	100-200 hrs.	P S
Flordaprince	From Florida, successfully grown in So. Calif./Arizona. Larger fruit than Desert Gold, more tolerant of desert heat, better flavor. Semi-freestone when fully ripe. Ripens early May in warm areas.	150 hrs	S
Honey Babe Mini	Sweet, yellow freestone, rich peach flavor. Heavy bearing 5' tree. Excellent choice for home orchard. Self fruitful.	<400 hrs.	P
Honey Babe High Head	Sweet, yellow freestone, rich peach flavor. Heavy bearing 5 ft. tree. Early to mid-July in Central California. Excellent choice for home orchard. (Zaiger) High head form has 18" trunk.	400 hrs.	P
May Pride	Very early ripening peach for warm winter climates. Ripens in May. Delicious, sweet and tangy, semi-freestone when fully ripe. The fruit is considered large for such an early peach. Large showy pink flowers are a plus in early spring. Self-fruitful	150-200 hrs.	S P
Mid Pride	Best yellow freestone for warm winter climates of So. Calif. This variety also has excellent flavor and dessert quality. Ripens in July. Self-fruitful.	250 hrs.	S P

Chill hours listed are approximate, many trees will perform well with less than stated chill hours.

# 2021 Fruit Tree List

Note: This is what was ordered inventories may change based on actual availability at shipping time.

Pix Zee Miniature	Large fruit ripens mid to late June in Central Calif., two weeks before Honey Babe. Delicious, firm, yellow freestone, beautiful red over orange skin. Vigorous to 6 ft. Self-fruitful.	<400 hrs.	S
Polly White	One of the most winter hardy peach varieties. Sweet, medium-sized, white fleshed fruit. Self fruitful.	1000 hrs.	P
Red Baron	Beautiful double red blooms. This is the best of both worlds. Excellent showy double red blooms followed by large, juicy, firm, richly flavored freestone fruit. Ripens in July. Self-fruitful.	250-300 hrs	S P
Saturn	Massive bloomer with double pink blooms. Flowering and fruiting peach. Large double pink blooms followed by large yellow freestone fruit which is sweet & juicy. The fruit has a fine flavor. Long time favorite in this area. Ripens in July. Self-fruitful.	250-300 hrs	P
Sauzee Swirl	Medium sized saucer style frut that is white fleshed swirled red.	400 hrs.	P S
Snow Babe Mini	First mini white peach! Peach plum ancestry.		S
Tropic Snow	Delicious, white low chill freestone, great for warmer winter areas. Superb flavor with a nice balanced acid-sugar blend. Showy blossoms in spring. Very low chill requirements. Self-fruitful	200 hrs	S P
4-in-1 Low Chill	Multi-graft trees with mild climate peaches. Probably Mid Pride, May Pride, Desert Gold & Eva's Pride	All low	S
4-in-1 Zaiger Pride	Eva's Pride, May Pride, August Pride, Mid Pride and June Pride	All low	S
<b>Peach/Nectarine</b>			
4-in-1-Showy Flowers (F-S-RB-MP-DD)			S
<b>PEAR</b>			
Fanstil	Large, crisp, juicy fruit. Most resistant to fireblight. Creamy yellow skin with slight blush. Consistant bearing tree. Ripens August to Sept.	150 hrs.	P
Flordahome	Low chill pear from Florida. Very nice quality; sweet, smooth textured, juicy, flavorful. Harvest July/August Partly Self-fruitful another variety of pear planted near by would improve harvest.	less than 400 hrs	S
Hood	Large smooth yellow-green skin pear. Buttery textured flesh containing a few small seeds. It has a sweet, mild flavor. Best if pollinated by other pears if they are in the neighborhood.	150-200 hrs	P S
Keiffer	Medium-large. Late season. Sprightly flavor, coarse texture. Great for canning and cooking. Resists fireblight, tolerates hot areas. Dependable producer. Self-fruitful	200-300 hrs	P S
Twentieth Century	Asian pear, medium round, thin yellow-green skin. Firm, juicy, cream-white flesh, unusual but pleasing flavor. Good for eating fresh or canning. Ripens in Aug. but the fruit can be stored for months. Self-fruitful.	300-400 hrs	P

Chill hours listed are approximate, many trees will perform well with less than stated chill hours.

# 2021 Fruit Tree List

Note: This is what was ordered inventories may change based on actual availability at shipping time.

4-on1 Asian Pear (Hosui-S-20-Ch)	Four varieties of Asian pears grafted on one tree		S
<b>PERSIMMON</b>			
Chocolate	Small to medium size, oblong, bright red skin. Sweet, spicy, firm, brown flesh, superb flavor the choice of connoisseurs. Astringent until ripe. Self-fruitful.	200 hrs.	P S
Coffee Cake "Nishimura Wase"	Unique spicy sweet, non-astringent, it can be eaten when still firm. Hardy, attractive tree usually free of pests and disease. Pollinize with Goshō or Chocolate varieties	<200 hrs	P S
Fuyu (Jiro) "Apple Persimmon"	Rounded flattened fruit. Reddish-orange skin. Non astringent, bears well as a young tree and is a heavy producer. This one does not have male flowers so it will have fewer seeds unless planted with other Persimmons. Ripens in Nov. Self-fruitful.	200 hrs.	P S
Giant Fuyu	Larger than Fuyu. Not as flat as Fuyu. Crunchy when ripe like Fuyu. Sweet, flavorful, non astringent. Easy to grow and does well in cool or hot climates. Fall harvest. Self-fruitful	200 hrs.	P S
Hachiya	Very large oblong fruit with rather a short point, acorn shape. Skin is bright orange-red covered with dark blotches. Large & best cooking quality. The tree is vigorous growing and upright with a nice shape. Astringent until soft ripe. Best in warm areas. Harvest in Nov. Self-fruitful.	200 hrs.	P S
Maru	Medium sized, orange-red, round fruit, very sweet. Beautiful glossy skin. Rich flavor excellent quality. If cross-pollinized flesh is dark cinnamon color, seeded and non-astringent. Ripens Oct to Nov. Self-Fruitful	200 hrs.	P
<b>PLUM</b>			
Beauty	Japanese variety. Sweet, flavorful, more widely adapted than Santa Rosa. Red over yellow skin, amber flesh streaked red. Ripens in June. Self-fruitful.	250 hrs	P S
Burgundy	Maroon-colored skin and semi-freestone flesh. Sweet with little or no tartness and very pleasing mild flavor. Rates high in taste test scores. Ripens July & Aug. Self-fruitful.	400 hrs	P S
Green Gage	Yellow-green skin, amber flesh. Partially self fertile, best with another pollinator.	700 hrs	S
Hollywood	Delicious blood red flesh & skin, low chill, good commercial variety. Low chill. Highly ornamental with burgundy foliage and lots of blooms in early spring. Self-fruitful	300-400 hrs	S

Chill hours listed are approximate, many trees will perform well with less than stated chill hours.

## 2021 Fruit Tree List

Note: This is what was ordered inventories may change based on actual availability at shipping time.

Mariposa (Improved Satsuma)	Larger red fleshed, sweet & juicy. The fruit is firm and delicious. Small pit, nearly freestone. Mottled maroon over green skin. Use fresh or cooked. Very low chill hours. Ripens in Aug. Pollinate with Catalina, Nubiana or Santa Rosa	250 hrs	S
Methley	Juicy sweet red flesh, mild flavor. Reddish-purple skin. Attractive tree and very heavy bearing. Ripens in June. Self-fruitful.	250 hrs	P S
Santa Rosa	The most popular plum in Calif. Juicy, tangy & flavorful. Large, oval purple-red skin with amber flesh, tinged with red. Pleasing tart flavor. Ripens in June. Self-fruitful.	300 hrs	S P
Satsuma	Large plum with dark, solid red skin & flesh. The firm, juicy fruit has an excellent sweet flavor, great for fresh eating, cooking, canning, or preserves. Ripens in late July into August. Use another plum tree for pollination such as Santa Rosa or Beauty	<300 hrs	P
Weeping Santa Rosa	Large oval fruit with purplish-red skin. Firm yellow flesh. Rich pleasing tart flavor. The tree is semi-dwarf in habit with a graceful, weeping shape. This tree can also make a very attractive espalier. Ripens in July. Self-fruitful.	200-400 hrs	P S
4 N 1 Japanese	Methley, Beauty, Santa Rosa, Burgundy, Golden Nectar	250-400 hrs	P S
<b>PLUOT &amp; PLUMCOT</b>			
Pluerry 'Candy Heart'	New in 2016, Japanese plum and sweet cherry parentage. Sub acid, sweet flavor. Pollinized by Sweet Treat and Burgundy Plum.	500-600	P S
Pluerry 'Sugar Twist'	Harvests a month earlier than Sweet Treat. This hybrid has red skin and yellow flesh with an especially enjoyable flavor: cherry sweet with a plum "twist". Needs a pollinizer.	800 hrs	S
Pluerry 'Sweet Treat'	Taste test winner. Creamy white & red fleshed freestone with wonderful plum-apricot flavor. Skin is greenish-yellow with red spots, turning to maroon and yellow dapple. Ripens in August. Pollinate with Santa Rosa, Burgundy or Supreme Pluot.	400 hrs	P S
Plumcherry 'Flavor Punch'	Sometimes a fruit is so flavorful it feels like it punches you in the mouth when you bite into it. This hybrid between Japanese plum and sweet cherry produces orangish red fruits that are a bit larger than a cherry. Any Japanese Plum should work as a pollenizer.	800 hrs	P S
Dapple Dandy Pluot	Creamy white and red-fleshed freestone with wonderful plum-apricot flavor. Pollinized by Flavor Supreme, Santa Rosa, Catalina or Burgundy Plum.	400-500 hrs	S P

Chill hours listed are approximate, many trees will perform well with less than stated chill hours.

# 2021 Fruit Tree List

Note: This is what was ordered inventories may change based on actual availability at shipping time.

Dapple Supreme	A new low-chill Pluot® for home gardens, Dapple Supreme derives its name from two of the best: Dapple Dandy and Flavor Supreme. With red dappled skin like Dapple Dandy and sweet, dark red flesh like Flavor Supreme,	300 hrs	P S
Emerald Drop Pluot	Medium to large sized fruit with green skin and yellow-orange flesh. Prolonged harvest; early picked fruit is firm, yet juicy sweet. Left to hang, fruit turns greenish-yellow with honey-like orange flesh. Pollinated by Flavor Grenade Pluot or Santa Rosa plum.	<400 hrs	S P
Flavor Grenade Pluot	Elongated green fruit with red blush. Crisp texture, flavorful. Hangs on the tree for 4-6 weeks. Pollinated by Flavor King, Dapple Dandy or Emerald Drop Pluots or Santa Rosa plum.	300-400 hrs	S P
Flavor King Pluot	Sweet, spicy flavor. Reddish-purple skin with crimson flesh. Naturally small tree. Pollinated by Flavor Supreme, Santa Rosa or Late Santa Rosa.	<400 hrs.	S P
Flavor Queen Pluot	Candy-like sweetness. Greenish-yellow skin, amber-orange flesh. Prolonged harvest is mid-July thru August. Pollinated by Dapple Dandy, Flavor King or Flavor Supreme Pluots or Japanese plum such as Burgundy.	400-500 hrs	S
Flavorosa Pluot	Deep purple skinned fruit with red flesh. Mild sweet flavor. Ripens at the end of May. Pollinated by Emerald Drop Pluot or Mariposa plum.	400 hrs.	S
Splash Pluot	Very sweet flesh. Pollenized by Santa Rosa plum or Flavor Grenade pluot.	400 hrs	P
Pluot, Zee Sweet Nuggets 4N1	Growing several varieties on one tree is a practical, fun way to produce more kinds of fruit in a small space as well as spread the harvest over a longer season. Splash, Emerald Drop, Flavor Grenade, Geo Pride	200-300 hrs.	PS
<b>POMEGRANATE</b>	<i>Some pomegranate trees may come in pots</i>		
Ariana	From Turkmenistan Dr. Levin Collection. Fruit is large and highly colored with bright red skin. Small edible seeds, wonderful sweet-tart taste. The fruit is considered very high quality. Self-fruitful	100-200 hrs.	P
Desertnyi	Sweet tart balance with citrus overtones. Mature fruit has orange juice-like flavor. Soft edible seed. Self fruitful.	200 hrs	P

Chill hours listed are approximate, many trees will perform well with less than stated chill hours.

# 2021 Fruit Tree List

Note: This is what was ordered inventories may change based on actual availability at shipping time.

Eversweet	Very sweet , virtually seedless fruit. Red skin, clear (non-staining) juice. It does well on the coast & equally well inland. It grows into a tall arching shrub of about 8'-10' tall. You can also train it into a small tree or espalier it as well. Large, showy orange blooms. Harvest late summer through fall. Self-fruitful.	150 hrs	P
Granada	This is a sport from Wonderful. Fruit is darker less tart in flavor compared to Wonderful. Redder flowers and seeds than Wonderful. Self-fruitful	150 hrs	P
Parfianka	Large size red fruit is sweet with a hint of acidity. Vigorous upright plant sets a heavy crop dependably. Maintain at any height with summer pruning. Consistently receives the highest praise for overall flavor. Great for juice or fresh eating.	<200 hrs	S P
Red Silk	Medium to large fruit, sweet berry flavor with great acid-sugar balance. Red silky exterior, firm but sweet edible seeds. Eat fresh or use in cooking. The plant is semi-dwarf and sets large crops of fruit. Self-fruitful	<200 hrs	S
Sweet	Sweeter than Wonderful, more widely adapted to cool summer climates. Small, glossy leafed ornamental tree with showy orange-red blooms in late spring. Very suitable for espalier and container plantings. Fruit can be stored for about 2 months. Ripens in Sept. Self-fruitful	100 hrs.	P S
Wonderful	Large purple-red skin fruit with delicious tangy flavor. Best variety for hot inland climates. Bright red-orange blooms, makes a nice ornamental too. The most well know. Ripens in Sept. Self-fruitful.	150 hrs	P S
<b>QUINCE</b>			
Smyrna	Extremely large fruit with light yellow flesh, bright yellow skin. Attractive tree (or multi-stemmed shrub) has dark green foliage and very showy bloom. Tolerates wet soil.	300 hrs	S P
<b>GRAPES</b>	All of our grapes are self fruiting and require about 100 hours of chill		
Black Monukka Seedless	Large, purplish-black, sweet, crisp fruit. Does not require as much summer heat as Thompson Seedless. Use fresh or dry for raisins. Cane or spur pruning.	100 hrs.	P S
Cabernet Sauvignon	Late season red wine grape. Small black strongly flavored berry. Vigorous upright vine. Cane pruning	100 hrs.	P S
Canadice	Early ripening, seedless grape derived from Himrod. Extremely winter hardy. Self fruitful, spur prune.	100 hrs.	P

Chill hours listed are approximate, many trees will perform well with less than stated chill hours.

Note: This is what was ordered inventories may change based on actual availability at shipping time.

Chardonnay	Most popular green-skinned grape in making white wine. A medium producing grape with average sized clusters and berries. It ripens earlier than most of the red varieties which helps it be less susceptible to late rains and rot	100 hrs.	S
Concord, Eastern	Medium-size clusters of edible, highly aromatic, blue-black grapes. Harvest late August to September. Skin separates easily from the fruit. This twining vine works well as a screen for arbors or trailing along fences.	100 hrs.	P
Concord Seedless	American grape, a sport of Concord. Berries very similar to Concord but seedless (or seeds are very rare). Bluish-black skin, green flesh, distinctive Concord flavor. Cane or spur pruning.	100 hrs.	P S
Flame Seedless	Medium size fruit with red skin & firm flesh. A good eating grape. Very productive. Use fresh or for raisins. Likes hot summer. Cane or spur pruning	100 hrs.	S P
Golden Muscat	American-European hybrid. Large egg-shaped berries are pale golden yellow when ripe. Highly productive, good in coastal areas as well as in warm interior areas. Cane pruning.	100 hrs.	S P
Himrod Seedless	Medium sized green seedless grape. Good for table uses, holds well on the vine. This grape is a better choice than Thompson Seedless along the coast. It does not require the heat Thompson needs for best production. Cane pruning	100 hrs.	P S
Interlakken	Hybrid of Thompson Seedless & American grape. More cold hardy than Thomspson. Fruit is sweet, crisp. Self fruitful, cane prune	100 hrs.	P
Lady Finger	Delicious, tangy, sweet fruit that is green in color and elongated in shape. Self fertile with fruit maturing in mid February.	100 hrs.	P
Merlot	Blue to black fruit, used for distinctive red wines. Best quality in cooler regions. Medium to large clusters of fruit, ripen in Sept. to Oct. Cane or spur pruning.	100 hrs.	S
Pinot Noir	Small black berries yielding famous French Burgundy wines. Requires cool summers, early harvest, cane pruning	100 hrs.	S
Princess	White, mid season grape. Vigorous grower, rivals Thompson.	100 hrs.	P S
Ruby Seedless (King Ruby)	Medium crisp fruit with dark red skin. Sweet mild flavor. Vigorous growing vine and a heavy producer. Good for table grapes or raisins. Requires less heat than Thompson or Flame. Cane or spur pruning	100 hrs.	S
Syrah	Dark skin, develops peppery and herbaceous notes with age.	100 hrs.	S
Zinfandel	A good grape for red wines. Medium sized, round, juicy fruit. Reddish-black, early to midseason ripening. Prefers mild winters and cool summers, heavy bearing, Spur pruning	100 hrs.	S P
<b>BERRIES</b>			
<b>BLACKBERRIES</b>			

Chill hours listed are approximate, many trees will perform well with less than stated chill hours.

## 2021 Fruit Tree List

Note: This is what was ordered inventories may change based on actual availability at shipping time.

Baby Cakes	New, thornless dwarf blackberry with compact habit that makes it perfect for patio pots. In most regions, this blackberry will produce twice in one season. Produces on second-year canes.	400 hrs	S P
Black Satin Thornless	Produces large berries, is disease resistant. Semi trailing vine with minimal suckering. Midseason harvest. Self fruitful but more productive with a second variety.	300-400	S P
Kiowa	Large and thorny. Berries are 3" long, firm and highly flavored. Upright growth requires no support.	200 hrs	S P
Marion	Thorny, floricanne-fruiting, trailing blackberry suited for the fresh market.	400-500 hrs	P S
Navaho Thornless	Medium sized fruit on the first fully erect self-supporting thornless. Superior fruit quality, less tart than other thornless cultivars. Ripens mid June to July.	800-900 hrs	P S
Olallie	Large (1 1/2" long 3/4" thick) shiny black firm berry. Sweeter and less tart than others. Vigorous growing and very productive. Commercially planted in California for market. Ripens June to July		P
Snow Bank	Produces large crops of "black" berries that are fully white when they ripen! Has been around since 1916 and is still a winner! Self fertile.		P
Triple Crown	Large, glossy black, juicy and flavorful. Good for fresh eating, it also makes delicious pies, sauce and jam. Vigorous and easy to harvest.		P
<b>BOYSENBERRY</b>			
Boysenberry Thornless	Few thorns. Very large berry, intense tangy, sweet flavor. Excellent quality and pleasant aroma.		P S
<b>GOJI BERRY</b>	Super food! High nutrient density & antioxidant value.		P
<b>GOOSEBERRY</b>			
Pixwell	Winter hardy, productive. Pink berries are tart, better for cooking.		P
<b>RASPBERRIES</b>			
Baba Berry	Large, sweet, good for mild winters & hot summers. Self fruitful.		P S
Caroline	Exceptional flavor. Produces on new wood, large yields.	200 hrs	S
Fall Gold	This berry has excellent flavor. It has a golden yellow fruit that ripens starting in June but the heavier crops come in Aug. & Sept. Use them fresh, frozen or for preserves. Self fruitful.	150-200 hrs	P S

Chill hours listed are approximate, many trees will perform well with less than stated chill hours.

Note: This is what was ordered inventories may change based on actual availability at shipping time.

Nova	Near-thornless variety, everbearing variety that is easy to grow & easy to pick. Produces firm, medium, bright red, medium sized fruit with a slightly tart flavor.		P
Raspberry Shortcake	Compact, rounded, thornless, growth habit to 2-3 ft. is perfect for patio container growing or any sunny, well-drained spot in the landscape.	800 hrs	P
<b>BLUEBERRIES</b>	<i>Note: Most Blueberries will produce repeat crops nearly all year long here, in our mild climate. Removing the fruit the first year is recommended to promote better vigor and larger plants. They like a rich 'acid' soil like Camellias. You can use a 'Camellia Mix' when you plant, or lots of peat moss. Plants may not go completely dormant in our winters.</i>		
Emerald	Abundant crops of very large berries with a mild, sweet flavor. Moderate growth to 5-6'. Potted.	250 hrs	P S
Jelly Bean	Large, sweet, flavorful blueberries in mid-summer. Foliage has distinctive elongated, green leaves with highlights of red in cooler climates. Mounded, compact growth habit to 1-2 ft., well suited to patio container growing or decorative use in landscape.	1000 hrs	S
Jubilee	Outstanding flavor for this early season blueberry. Fruit is medium to large, light blue. Consistently productive bush, even in less than optimum blueberry sites. From USDA breeding program. Upright bush 5' to 6' tall, early season ripening.	400 hrs	P
Misty	Early ripening, quite vigorous growing, does very well along the coast and with inland heat. The fruit has excellent flavor and has a very low chill requirement.	150 hrs	S P
O'Neal	Large firm, very sweet fruit. Outstanding newer variety from N. Carolina State Univ. and USDA breeding program. Good heat tolerance. Yields comparable with the best Northern High Bush varieties. <u>Self-fruitful but produces better when planted with</u>	200 hrs	P S
Peach Sorbet	Compact-growing blueberry is a stunner: leaves of peach, pink, orange and emerald green. White bell-shaped flowers in spring, followed by flavorful, sweet blueberries in summer. Mounded shape, growing to 1 1/2 -2 ft. In most climates, the leaves are held throughout winter, turning to a rich purple color.	300 hrs	S
Pink Icing	Distinctive foliage colors and large, richly flavored berries. In spring, the foliage has many shades of pink, mixed with blue and deep greens. The leaves turn a showy iridescent turquoise blue in winter. Mounded, compact growth habit to 3-4 ft. Adapted to patio container growing or landscape use for year-round color.	500 hrs	S P

Chill hours listed are approximate, many trees will perform well with less than stated chill hours.

Note: This is what was ordered inventories may change based on actual availability at shipping time.

Pink Lemonade	Compact, pink blush fruit, low chill.	300 hrs	P S
Sharp's Blue (Sharpblue)	Number one Southern High Bush planted in Florida. Fruit is medium size. medium blue in color. Average firmness with good	200 hrs	P S
South Moon	Large, firm excellent berries that have superb flavor. The plant is upright & vigorous. It prefers light sandy, good draining soil and does well in So. Calif, inland & coastal. Ripens early season.	200-300 hrs	S P
Sunshine	This one performs for gardeners from San Diego to Seattle. Evergreen compact plant to about 3' tall. Heavy crops & low chilling requirements, yet frost hardy. Tolerates a higher pH than most other blueberries. Self-fruitful.	150 hrs	P S
	<b>OLIVES</b>		
Arbequina	Mild and fruity, low bitterness. High oil content. Self fruitful but produces higher yields with a pollenizer such a Arbequina. California's top variety for oil production.		P
Arbosana	Mainly grown as a compliment to Arbequina. More robust flavor than Arebequina. Fruit matures about 3 weeks later too. Self fruitful but produces higher yields with a pollenizer such a Arequina.		P
Koroneiki	Peppery flavor and used mainly as a blending varietal. Frost tender, self fruitful but produces higher yields with pollenizers such as Arbequina or Arbosana.		P
Mission	Classic Calif. Olive, most versatile for th ehome garden. Use for curing or oil production. Colder hardy than most varieties. Self fruitful but produces better with a pollenizer.		P
Picual	High yield of oil. Not a good table olive.		P
	<b>Hops</b>		
Cascade	Very productive, with large, attractive flowers used for flavoring beer. Aroma is spicy with citrus-y quality. Green cones ripen in midseason, on disease-resistant vines. Plants can climb to 25' in one season, and grow into beautiful vines with beautiful dark foliage. Provide strong supports.		P S
Centennial	Imparts outstanding citrusy, flowery flavor and aromatics to your artisanal home brew. Prolific, vigorous, winter-hardy plants thrive in the full range of U.S. regions.		P S
	<b>Ornamental Quince</b>		
Pink Lady	Striking pink flowers. Compact shrub grows to 4-6'.		P
Texas Scarlet	Orange-red flowers in spring, Round-shaped shrub. Height to 3 ft.		S P

Chill hours listed are approximate, many trees will perform well with less than stated chill hours.
